Hi Vince.

We will help any way we can.

1361978.txt

Thanks!

Subject: EOL Data Mi ni ng

Jay,

I have to add another item to a long list of your headaches.

Greg Whalley gave us marching orders to treat the development of quantitative models for data mining of EOL trade records as the top priority.

I shall be providing Greg bi-weekly updates on the project.

FYI only. I am flying with Greg next week to a meeting with a third party that may be involved in some aspects of this project. I shall tell you more when we meet.

I know that we, as well as Greg, can count on full support and cooperation from you.

I shall ask my assistant, Shirley Crenshaw, to set up a meeting with you next week after I
